High-Performance Network Cameras Enabling Video Monitoring with Audio

Network 1/4" Color CCD DSP High-Resolution Day/Night Vandal-Resistant PTZ Dome Camera

DC-DPN9585P

DAY NIGHT

Wide Area Surveillance with a x2.6 Pan-Focus Lens and PTZ Control

Deep focus technology brings every area on-screen into crisp and clear focus for a precise picture with greater depth of field. In addition to the pan-focus lens developed by SANYO, VDC-DPN9585P and VCC-PN9575P cameras feature pan-tilt-zoom (PTZ) functions allowing remote control over a network for surveillance of wide areas.

Network 1/4" Color CCD DSP High-Resolution PTZ Dome Camera

VCC-PN9575P

SANYO Security Systems for the Creation of a Full-fledged LAN or Internet

Video captured by camera can be viewed using the bundled VA-SW3050LITE viewer software. Use of the VA-SW3050 archiving software (sold separately) allows simultaneous monitoring of streams

from up to 128 cameras as well as recording of

live audio and video data.

* Use of the VDC-DPN9585P's or the VCC-PN9575P's built-in networking features allows viewing of video from a single camera with a generic web browser (Internet Explorer).

Digital Image Processing Suited to Networked Output

Image processing of JPEG images offering versatility has been adopted for transmission of high-quality images. This lightens the burden placed on the network and increases precision in surveillance.

Alarm Notification Functions

When a potential security threat is detected, a single surveillance video image from that moment is sent by email as an alarm notification. Email addresses can be set in advance so that notification is sent to up to five locations.

Networked Centralized Control of Data from a Variety of Surveillance Points

Management of video from surveillance points under a variety of conditions — whether outdoors, at remote locations, or at night — can be consolidated at a PC in a control center. This enables efficient operation of 24/7 systems and broadbased surveillance for retail outlets or large-scale facilities.

Two-Way Voice Transmissions between Camera and PC

Two-way communications inclusive of voice exchanges between a control room and surveillance points allow instructions issued from the control room to surveillance points while viewing images sent from cameras or, conversely, voicing of opinions from surveillance points to the control room.

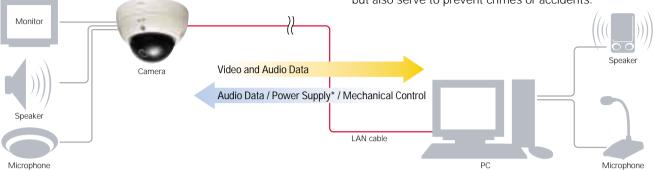

VDC-DPN9585P/VCC-PN9575P

Surveillance-Point Monitoring with Video and Audio Data

The VDC-DPN9585P and the VCC-PN9575P are equipped to enable two-way voice communications via audio signals sent between cameras and PCs. Transmission of crystal clear images together with audio offers those overseeing surveillance as a sense of being right there at the scene.

Audio Transmission from Control Center PC to Surveillance Point

Audio transmissions can be sent from the administrator's side to the camera so as to provide advice or cautionary notices in the event of unaccounted for activity and other events during surveillance. Voice exchanges with personnel at surveillance points not only enable a more accurate grasp of the situation but also serve to prevent crimes or accidents.

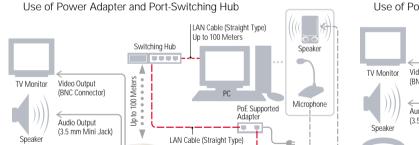

- The VCC-PN9575P features a built-in microphone
- Both the VDC-DPN9585P and the VCC-PN9575P can be connected to external microphones, speakers and monitors.
- * Power adapter required.

■ PoE Example 1:

Connection Examples

Both the VDC-DPN9585P and the VCC-PN9575P support the IEEE 802.3af standard for Power-over-Ethernet (PoE) applications to allow power supplied over LAN cabling. In addition to making installation easier, this allows camera installation in places where it would otherwise be difficult to secure a power source.

- LAN cable types required will vary according to the switching hub or router used.
- Do not use the camera's power supply when using PoE.
- The VA-50H heater board (sold separately) for use with the VDC-DPN9585P cannot be used when using PoE.

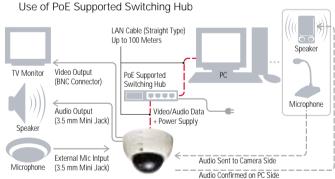

Video/Audio Data + Power Supply

Audio Sent to Camera Side

Audio Confirmed on PC Side

■ PoE Example 2:

 Longer transmission distances are possible than those using a power adapter and a switching hub as in example 1.

■ Example of Use without PoE

External Mic Intput

(3.5 mm Mini Jack)

Microphone

Basic Connection
 Connection by LAN cabling (crossed type) between camera and PC.

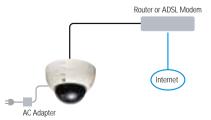

● LAN Connection

Connection of camera to LAN by LAN cable (straight type) using switching hub, etc.

Internet Connection

Connection of camera and router by LAN cable or ADSL modem, etc. when used for LAN connection.

- Router connected using straight type cabling.
- Confirm connection method when connecting an ADSL modem or other device.
- Please use a type of LAN cabling that is shielded.

Network Archiving Software

VA-SW3050 (Sold separately)

The VDC-DPN9585P and the VCC-PN9575P are bundled with VA-SW3050LITE viewer software allowing live video streams sent from cameras to be monitored on a PC. This software also supports audio transmissions and remote control of cameras, making it excellent for smooth configuration and management of surveillance systems.

VA-SW3050 network archiving software is sold separately in answer to needs for archiving of surveillance video and audio captured by cameras. With a PC used as a local server, the VA-SW3050 software enables not only data playback and recording but also improved system operability, making it a powerful tool for network management.

Simultaneous Recording from Up to 128 Cameras

VA-SW3050 software simultaneously records video and audio data from up to 128 cameras. High-resolution images are recorded at a rate of 25 IPS* for smooth playback comparable with television.

*CPU: Pentium 4, 3.06 GHz or higher, Memory: 512 MB RAM Picture setting: BASIC, Picture size: 720 x 286, Single camera connection

Surveillance Camera Control via Network

Setting of camera IDs allows precise condition setting for each surveillance point. Also enabled is control of panning, tilting, zooming and other camera functions.

Simultaneous Access by Up to 16 Users

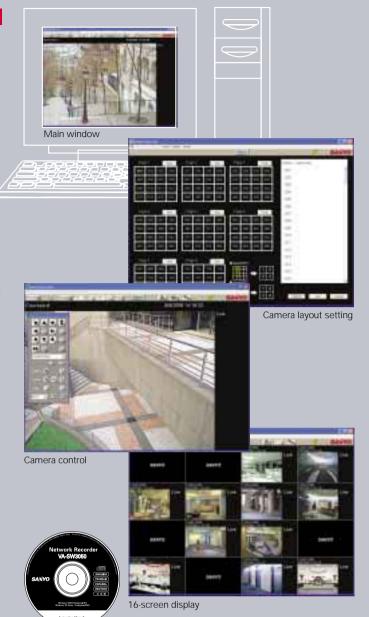

Recorded video and audio can be accessed by up to 16 users simultaneously. User access is managed by password to differentiate those at the administrator level, with the authority to alter settings, and those at the user level, with the right to monitor surveillance video and audio.

Other Features

- Display switching between full, guad or 16 split screen
- Simultaneous playback and recording of video and audio
- Flexible settings with a wide array of recording modes
- Easy-to-use graphical interface
- Time data search function
- Alarm search function
- Timer recording

16 Preset Positioning and Sequential Monitoring **Functions**

Up to 16 preset positions (with different settings for pan, tilt and zoom) can be registered for a single VDC-DPN9585P or VCC-PN9575P. A simple key entry to

a controller allows you to easily switch to the scene you want to monitor. Auto-pan monitoring can be also be programmed by designating two end points on a horizontal plane.

PTZ Operations

Both the VDC-DPN9585P and VCC-PN9575P come with a PT mechanism and allow panning of 335 degrees (110 degrees*) and tilting of 90 degrees (90 degrees*) to reduce blind spots in the surveillance area. When particular angles are preset on the camera (up to sixteen points), it moves to each position quickly at the speed of 120 deg/sec. max. for both panning and tilting. Combining these features with the motion detector, it is possible to catch all actions taking place in the area.

*For wall-mounted cameras

Wall mou	enting
Panning	−55 to 55°
Tilting	0 to -90°

Photos of VDC-DPN9585P

Adjustment via VAC-70 Control Unit (Sold Separately)

Connection of the VAC-70 control unit allows adjustment of pan/tilt, angle of view, motion detector, backlight compensation and other functions from in front of a monitor. The lens

angle can be adjusted directly via a control switch inside the camera housing.

Control switch

nside camera

Monitor

Intelligent Backlight Compensation

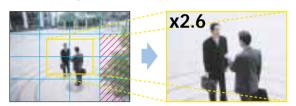

The VDC-DPN9585P and VCC-PN9575P feature two selectable backlight compensation modes: multi-spot metering (applied to the whole screen) and center-zone metering (applied to the central portion only).

Multi-spot metering measures luminous intensity in 64 areas on screen to enable optimal backlight compensation even for peripheral and moving objects

Flexible Motion Detection

Sensing is performed by splitting the field of view into 16 areas. Movement and brightness levels within the picture are analyzed to accurately detect surveillance targets. Upon detection, the camera sends an alarm status signal and captures the object at zoom magnifications of up to x2.6. Fine adjustments of settings such as sensitivity, tracking time, zoom ratio and areas not requiring detection can also be made.

Areas with swaying trees or flickering light, etc. can be eliminated to avoid false alarms. Surveillance of the detected object can be conducted at a zoom magnification of x1.0, x1.4, x2.0 or x2.6

Privacy Masking (Up to 8 Masks)

When there is a house or even an object as small as a window within the camera frame, it is possible to mask the area so that it will not appear on the monitor screen to protect other's privacy.

Up to 8 rectangular masks of arbitrary size can be set. These masking areas may be protected with a 4-digit (max.) password.

520 TV Line Resolution (Analog Video Signal)

Featuring SANYO's DSP circuitry and a high performance 1/4inch CCD for horizontal resolution of more than 520 TV lines and superior color reproduction. Sharp, crisp images are delivered for greater precision in surveillance under a varied range of conditions.

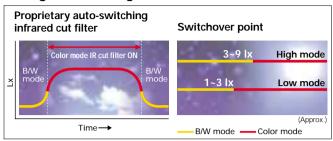

Built-in Electronic Shutter

A high-speed electronic shutter that is internally switchable for eight modes using a DIP switch allows adjustment increments from 1/50 to 1/10,000 sec.

Operation on PoE, AC or DC Power Sources

The VDC-DPN9585P and VCC-PN9575P can operate on PoE, 12 V DC (12-15V DC) or 24 V AC (50 Hz, and even at a tolerance of ±10%). Switching to the correct mode occurs automatically when power is supplied.

Intelligent Switching from Color to B/W

Switching between color mode during daylight hours and monochrome at night is done automatically (manual switching also possible). Selection of switching settings can be made from a range of 1 to 10 lx.

User-Friendly Design and Easy Setup VDC-DPN9585P/VCC-PN9575P

Installation, Setup and Operation Made Easy by Simple, User-Friendly Design

Based on a development concept featuring a pan-focus lens for the realization of advanced surveillance functions together with enhanced operability and ease of installation. The VDC-DPN9585P and VCC-PN9575P increase lens function and camera maneuverability to simplify operation, save resources spent in installation and substantially heighten the available degree of freedom.

9

Tough Die-Cast Aluminum with Polycarbonate Dome

Housed in an exceptionally tough die-cast aluminum enclosure and a polycarbonate

dome for extra durability under the most demanding of conditions. To protect against tampering, the screws of the enclosure cover have a unique shape that prevents it from being opened with ordinary tools.

IP66 Rated Weatherproof Design

High Sensitivity, Minimum Required Illumination

(F1.9, 20 IRE)	0.024 lx	0.48 lx
(F1.9, 50 IRE)	0.06 lx	1.2 lx

Easy Interior Access and Setup

Inside the housings of the VDC-DPN9585P and VCC-PN9575P are camera units with integrated motors and lenses. Installation on ceilings or walls can be accomplished without difficulty and components such as the camera unit or an optional heater board* can be attached and detached easily in just a few steps.

*The heater board option can be mounted only in the VDC-DPN9585P.

Mounting and Installation

The product pictured below is the VDC-DPN9585P. Specifications differ slightly in the case of the VCC-PN9575P. Please refer to the operating instructions supplied with each product for details.

The camera unit and board can be attached or detached by simply sliding the stopper.

Attach the camera unit to the bottom cover mounted at the surveillance point (ceiling or wall).

VA-50AS

+ VA-50BPS

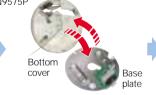

Set up and adjust according to the installation site.

Note: In the case of a wall mounted setup, hold down the clamp and release the hooks, then lift the camera unit and turn it 90° to attach it

Wall mounting

Hold down the button on the side of the housing and detach the base plate from the back of the camera.

Short ceiling mounting

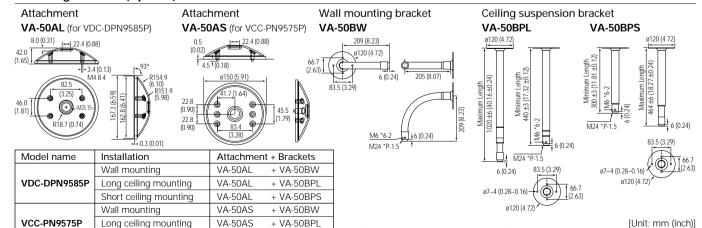

Set up and adjust according to the installation site.

Installation is completed by simply attaching the camera to the base plate

Mounting Brackets (Options)

Note: Attachments and brackets presented are for indoor use.

In cases of outdoor use, measures must be implemented to ensure waterproofing.

Options (sold separately)

VA-50H

Heater board

for VDC-DPN9585P

Heater board providing protection from cold for camera unit. Allows use in –30°C operating environments (24 V AC only).

VAC-70 Camera control unit

Pan-Focus Camera Lineup

1/4" Color CCD DSP High-Resolution

VCC-P7575PA Indoor Mini Dome Camera

VDC-DP9585P Vandal-Resistant Day/Night PTZ Dome Camera

VCC-P9575P Indoor Mini PTZ Dome Camera

Day/Night Zoom Camera tered trade-

VCC-XZ200P Weatherproof
